

# OMEGA V2 HPA

The OMEGA V2 Airsoft rifle combines high performance, versatility, consistency and speed while allowing players to ditch the air hose traditional HPA guns are strapped to.

Featuring smooth crisp trigger action, variable air setup adaptability and flip-up front and rear sights. This is one of the most silent airsoft rifles on the market to date powered by the outstanding Tippmann Electro-Pneumatic Technology. The OMEGA V2 brings you the best technology that you know from high level paintball into airsoft.

If you want high performance, adjustability and shot consistency this is it!

94487 - Omega-PV Carbine w/ 13ci

94488 - Omega-PV CQB w/ 13ci

\*EU VERSION SHOWN / US VERSION COMES WITH ORANGE TIP
